

Project Summary Template

This document is intended to provide a summary understanding of the high-level vision of your project goals.

Company Name/ Team Name	N/A
Company Address	N/A
Company Website	www.drivetree.ca
Telephone	N/A
Company Contact/ Team member names	1. Feroz Nashiruddin 2. Thomas Anudhin, 3. Syangbo Heemal, 4. Yohannan Jeffin,
Title	DriveTree: Book · Learn · Go (<i>Driving Instructor and Lesson Booking Platform</i>)
Company Email/ Email address for all team members	heemal.syanbgo@georgebrown.ca , anudhin.thomas@georgebrown.ca , jeffin.yohannan@georgebrown.ca , nashiruddin.feroz@georgebrown.ca
Telephone	• Heemal: 437-221-0644 • Jeffin: 647-242-2925 • Anudhin: 647-553-2033 • Nashiruddin: 437-267-8024
Project Title	DriveTree: Book · Learn · Go
Project Description	<u>About the company:</u> DriveTree Solutions is a student-led team dedicated to building practical software that helps people in everyday life. Our aim is to create tools that are intuitive, effective, and directly address real-world problems in Canada and beyond. <u>About the project:</u> Drivetree is a web app that connects students with verified driving instructors and schools. Students can search by location, price, car type, language, and rating, then book lessons directly in the app. Instructors can create profiles, upload license documents for verification, set availability on a calendar, and receive reviews from real students. The web app aims to make learning to drive simpler, safer, and more transparent.

Problem/ Opportunity Assessment *	1) Students and newcomers in Canada find it hard to locate qualified, affordable instructors with proof of credentials. 2) Booking lessons today is messy: scattered listings, calls, texts, and no standard way to compare options. 3) Instructors lack a single place to manage schedules, collect reviews, and reach new students without extra advertising costs
Desired Project Outcomes/ Requirements*	1) A simple platform where students can search, book, and review instructors and schools. 2) An instructor verification flow so only licensed instructors appear in search. 3) A calendar-based booking system that prevents double booking and supports rescheduling. 4) Ratings and reviews that unlock only after a completed lesson to keep feedback honest.
Key Deliverables to be produced by students*	1) A working prototype (web) with login, instructor profiles, booking, and reviews. 2) A database and backend API for users, instructors, lessons, and ratings. 3) An admin dashboard to verify instructor licenses and handle reported issues.
Desired Start Date	Sept 15, 2025
Desired End Date	March 27, 2026
Attachments	1) Brief market scan of Canadian driving lesson platforms (Kruzee, Drivisa, etc.). 2) Competitive comparison table and feature gap notes.
