SUMMARY

Computer Programming & Analysis student with hands-on experience building and deploying full-stack web applications using JavaScript, React, Node.js, and REST APIs. Strong foundation in backend development, cloud deployment, and CI/CD through academic and personal projects. Experienced working in team-based environments with transferable leadership skills. Seeking Software Developer Intern or Junior Software Developer roles.

SKILLS

Languages & Frameworks: JavaScript, React.js, Node.js, Express.js, HTML5, CSS3

Backend & APIs: REST APIs, JWT authentication, Multer (file uploads)

Databases: MongoDB Atlas, Mongoose ODM, PostgreSQL (basic)

DevOps & Systems: Git, GitHub, Docker, Jenkins, SonarQube, Linux (Ubuntu), Microsoft Azure

Deployment & Tools: Vercel, Render, Postman

Practices: Agile collaboration, debugging, system analysis, version control

PROJECTS

DriveTree – Capstone Project (In Progress)

- Building a full-stack platform using React, Node.js, and REST APIs to connect learners with driving mentors.
- Developing frontend components and backend services with database integration.
- Collaborating with a team to design, implement, and test application features iteratively.

Full-Stack Employee Management System (MERN Stack)

- Built and deployed a full-stack web application for managing employee records.
- Implemented CRUD operations, JWT-based authentication, and file uploads via RESTful APIs.
- Deployed frontend on Vercel and backend on Render with environment-based

configuration.

- Tested API endpoints and verified data persistence using Postman and MongoDB Atlas.

Weather Application – Live API Project

- Developed and deployed a full-stack weather application consuming live external APIs.
- Implemented backend logic to fetch, process, and serve real-time data to the frontend.

DevOps Cloud Infrastructure & CI/CD Setup

- Deployed a cloud-based DevOps environment using Azure Virtual Machines and Ubuntu Linux.
- Configured Jenkins CI/CD pipelines integrated with GitHub repositories.
- Installed and configured SonarQube with PostgreSQL for static code analysis.
- Managed Docker containers, Linux services, SSH access, and Azure network security rules.

EXPERIENCE

Warehouse Associate / Team Lead

Aug 2021 – Aug 2023

Richelieu Hardware Ltd — Toronto, ON

- Coordinated daily warehouse operations and assigned tasks based on priority.
- Communicated with cross-functional teams to maintain workflow accuracy.
- Trained new team members and ensured adherence to safety and operational standards.

Team Supervisor

Aug 2016 – Nov 2020

The Arbor School, Hamdan University, Dubai University — Dubai, UAE

- Supervised staff and supported daily operations in a structured environment.
- Resolved operational issues and maintained clear communication across teams.
- Demonstrated leadership, accountability, and problem-solving skills transferable to technical roles.

EDUCATION

Advanced Diploma — Computer Programming & Analysis

George Brown College, Toronto, ON

Currently Enrolled

BA of Arts (Economics & Geography)

Govt. Degree College, Kullu(H.P.) India

May, 2010
