PROFESSIONAL SUMMARY

Recent Computer Programming & Analysis graduate from George Brown College with hands-on experience developing responsive full-stack web applications using JavaScript, React.js, Node.js, MongoDB, and REST APIs. Strong foundation in frontend development, backend API integration, authentication workflows, debugging, and deployment through academic and personal projects. Experienced collaborating in Agile team environments using GitHub workflows and modern development practices. Additional exposure to Angular, TypeScript, Docker, Jenkins, SonarQube, and Microsoft Azure cloud environments. Seeking Junior Frontend Developer, Full-Stack Developer, or Software Developer opportunities.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Frontend Development: React.js, Angular (Basic), Responsive Web Design, Component-Based UI Development

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, API Integration, Multer

Databases: MongoDB Atlas, Mongoose ODM, PostgreSQL (Basic)

DevOps & Cloud: Docker, Jenkins, SonarQube, Microsoft Azure, Linux (Ubuntu), CI/CD Pipelines

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, VS Code

Development Practices: Agile/Scrum, Debugging, Software Testing, Version Control, Team Collaboration

PROJECTS

DriveTree — Full-Stack Driving Mentor Platform (Capstone Project)

Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs

- Collaborated in a team-based Agile capstone project to develop a full-stack platform connecting learner drivers with driving mentors
- Developed responsive frontend components and integrated backend REST API services for booking and application workflows
- Implemented frontend and backend integration with MongoDB database functionality and API communication
- Contributed to debugging, UI improvements, authentication workflows, testing, and iterative feature development using GitHub collaboration

Employee Management System — MERN Stack Application

Technologies: React.js, Node.js, Express.js, MongoDB Atlas, JWT Authentication

- Built and deployed a full-stack employee management application supporting secure CRUD operations and protected user authentication workflows

- Implemented JWT-based authentication, protected routes, and file upload functionality using Multer middleware
- Integrated MongoDB Atlas cloud database services and tested REST API endpoints using Postman
- Deployed frontend and backend services using Vercel and Render with environment-based configuration management

Weather Application — API Integration Project

Technologies: JavaScript, Node.js, REST APIs

- Developed a weather application integrating external APIs to retrieve and display real-time weather information
- Implemented backend API request handling, asynchronous API calls, and frontend data rendering workflows
- Applied debugging and error-handling techniques to improve API response reliability and application performance

EXPERIENCE

Warehouse Associate / Team Lead — Richelieu Hardware Ltd, Toronto, ON

Aug 2021 – Aug 2023

- Coordinated daily operations and delegated tasks based on workflow priorities and operational deadlines
- Collaborated with cross-functional teams to maintain workflow efficiency and operational accuracy
- Trained new employees on operational procedures, workflow standards, and team responsibilities

Team Supervisor — Dubai, UAE

Aug 2016 – Nov 2020

- Supervised operational workflows and coordinated communication across teams and departments
- Resolved operational issues while maintaining organized and structured daily processes
- Developed strong leadership, accountability, adaptability, and team management skills transferable to technical environments

EDUCATION

George Brown College — Toronto, ON

Advanced Diploma — Computer Programming & Analysis (T177)

Graduated: April 2026

Govt. Degree College, Kullu (H.P.), India

Bachelor of Arts — Economics & Geography

Completed: May 2010

ADDITIONAL INFORMATION

- Open to Full-Time, Internship, and Entry-Level Opportunities
- Eligible to work in Canada
- Portfolio projects and source code available on GitHub
